

## 4-day Workshop on “Therapeutic Skills for the Home-Based Treatment of Adult Hemiplegia”

(Course Code: AE-19B-07)

### Description

This workshop equips therapists with necessary knowledge, skills and competency in delivering home-based assessment and intervention for clients with neurological impairments, with particular reference to adult hemiplegia.

### Contents

- Major approaches in the assessment and management of neurological clients
- Assessment of the client's needs and of the home environment and surroundings.
- Consideration in the use of available resource potential in a home-based setting.
- Case sharing.

### Objectives

- ✓ To understand the knowledge base for analyzing normal and abnormal movement and function
- ✓ To appreciate the concepts and strategies in assessing and managing adult hemiplegia.
- ✓ To acquire skills in facilitating movement from different starting positions.
- ✓ To develop competent practical and clinical skills handling, assessing and treating adult hemiplegia in a home-based setting.
